

## Commitment to Excellence

It is important for young players to have a strong understanding of the basic fundamentals of football.

Fundamentals are taught on a day to day basis throughout a player's career. Football is not a science; it is a sport. It is a game that requires agility, strength, and speed. It also requires the player to understand the techniques and the concepts of this contact sport. Becoming a great player is a step by step commitment to excellence.

This camp will take beginners and young players and teach them the fundamentals to ensure their success in their future football career. This camp also gives players the opportunity to meet and work with players from other schools and football leagues from around our region.
